OPERATION & MAINTENANCE SERVICES
LEMAX O&M TEAM

We deliver complete MEP, building fabric and specialist maintenance services through a dedicated site-based team. Lemax O & M team will become an integral part of the buildings management team and will endeavor to present, operate and maintain the building in a way that exceeds expectations.

Lemax O&M team has rapidly established itself as a key property solutions and maintenance provider in Qatar. Delivering our extensive range of services and helping our customers with solutions to their property O & M problems no matter how trivial or complex the job. We ensure the fastest, most efficient, most cost-effective and essentially most reliable property maintenance services to your business.

We provide a full range of property O&M and refurbishment services 24x7 basis using our experienced teams. Lemax O&M team always works to complete every job in a time-sensitive manner, leaving you with the peace of mind.

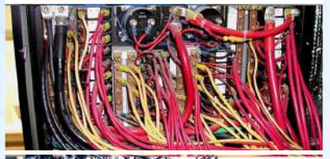

As a leading property O&M company, our promise is to deliver a tailormade solution to meet the highest standards in the industry.

PLANNED PREVENTIVE MAINTENANCE

The entire team will be mobile and dynamic with the ability for specialist Engineers to support general technicians to undertake tasks or respond to breakdowns or failures where their attendance is required. We consider this the most cost-effective arrangement to provide a maintenance service as well as being able to complete task in line with the service level agreements.

REACTIVE MAINTENANCE

Our on-site maintenance team will proactively manage reactive maintenance works. Our team will operate a closed loop process from receipt of the call, whether it originates from the Client representative or from a source direct on site, through response and rectification, to reporting status and completion. All activity will be tracked through the dedicated system to enable management through tracking and reporting. This service will be available on a 24x7 basis.

QUALITY MANAGEMENT

Lemax Electrical & Mechanical Trading WLL is committed to effective of customer needs laid down in the specifications, contract document, national and international standards and company documented Method statements and Inspection Test Plans.

Documents/Procedures shall be developed by the company in line with the customer specifications/ documents to ensure effective implementation, control of process, prevent nonconformities at all stages of work and to demonstrate adequate confidence in customers that the product meet his requirements.

FAQs

What are some essential safety measures to consider during Project/Construction work?

The following are the essential safety measures to employ during construction work:

- Provide appropriate personal protective equipment (PPE) for all workers.
- Conduct regular safety training and toolbox talks.
- Implement fall protection systems and guardrails on high-rise projects.
- Follow strict electrical safety protocols.
- Ensure proper scaffolding and ladders are used.

How can I effectively manage and organise a project/Construction site?

To effectively manage and organise a project site, you must ensure to develop a detailed project schedule with clear milestones. Here are some key factors to consider after commencing Project/Construction work:

- Maintain open communication among the workforce.
- Assign clear roles and responsibilities to each team member.
- Set up storage facilities and waste disposal areas.
- Provide accommodation to labour.
- Regularly inspect and maintain equipment and machinery.

What are some common challenges in construction projects and how can I address them?

These are the usual challenges you may face and how you deal with them:

- Budget overruns : Regularly review and update your budget, be active to identify cost-saving opportunities and prioritise expenses.
- Delays : Use a well-planned schedule, monitor progress closely, and address issues behind delays instantly.
- Weather disruptions : Plan for potential weather-related delays such as incessant rains and have contingency measures in place.

MANUFACTURER & GLOBAL DISTRIBUTOR

Exclusive Distributor of Calix UK Lighting Solutions

Lemax Electrical & Mechanical Trading WLL is honored to be the authorized and exclusive distributor of Calix UK across the entire GCC region, including Qatar, United Arab Emirates, Saudi Arabia, Oman, Kuwait, and Bahrain. Calix UK is a prestigious British lighting brand recognized for its cutting-edge design, uncompromising quality, and adherence to global safety and performance standards.

This strategic partnership allows us to offer a comprehensive portfolio of premium indoor and outdoor lighting products, including architectural, commercial, industrial, and landscape lighting. The Calix UK product range is engineered with precision, merging British innovation with energy efficiency, environmental responsibility, and aesthetic appeal, making them ideal for high-end developments, public infrastructure, and bespoke commercial projects.

As the exclusive distributor, Lemax is fully equipped to support:

Project Consultation & Lighting Design Assistance:

Helping clients specify the right solutions tailored to project needs.

Technical Support & After-Sales Service:

Ensuring optimal product performance throughout the project lifecycle.

Stock Availability & Logistics Management:

Strategically maintaining inventory to ensure timely delivery across the GCC.

Training & Product Demonstrations:

Equipping contractors, consultants, and clients with product knowledge and application guidance.

Our exclusive representation of Calix UK reflects our commitment to delivering not just products, but solutions that elevate the standards of lighting across the Gulf region. With a shared vision of innovation and excellence, Lemax Electrical & Mechanical Trading WLL and Calix UK continue to illuminate the future of the Middle East's lighting industry.

Calix Uk Switches

As part of our exclusive distribution of Calix UK products, Lemax Electrical & Mechanical Trading WLL proudly offers the Calix UK range of premium electrical switches, crafted to deliver exceptional performance with a distinct sense of style. These switches are more than just functional components—they are design elements that elevate the aesthetic of residential, commercial, and hospitality interiors.

Calix UK switches are manufactured to the highest British standards, ensuring durability, safety, and long-term reliability. The brand's commitment to design excellence is reflected in a curated selection of luxurious finishes, suited to complement both modern and classical interiors.

Available Finishes:

Antique Gold

A timeless, sophisticated finish with a vintage appeal, ideal for traditional or heritage-themed interiors.

Brushed Brass

Subtle yet stylish, this finish offers a warm tone with a refined texture, balancing luxury and modernity.

Polished Brass

Bold and elegant, the high-shine surface adds a touch of opulence to any room setting.

Brushed Chrome

Clean, contemporary, and versatile—perfect for minimalist or industrial-inspired spaces.

White Line & Black Edge Series –

A striking contrast design that merges sleek minimalism with bold detailing, suited for high-end modern environments.
